Learning Objectives

- This workshop teaches fundamental knowledge and technical skills to perform laparoscopic surgery including different techniques of laparoscopic suturing and knotting
- It includes didactic sessions and hands-on skills training on dry and wet labs
- Cognitive topics related to types and techniques of laparoscopic suturing and knotting
- Technical skills taught include two-handed manipulation of laparoscopic instruments, intra-corporeal suturing and knot tying

Learning Outcomes

At the end of this course each student should be able to:

- Safely introduce and pick up a 1/2 curved needle in an appropriate position to make a bite through tissue.
- Pass a needle and suture through tissues at suitable depth and distance for interrupted and continuous suturing.
- Tie a safe laparoscopic Surgeon's knot.
- Create a laparoscopic tumbled square knot.
- Demonstrate continuous suturing, maintaining tension and completing the suture line safely.
